

Replication #2

Jack Schroeder

2/18/2019

Abstract

I replicate “Causal effect of intergroup contact on exclusionary attitudes” (Enos (2014)) using code/data deposited in the Harvard Dataverse (Enos (2017)). There are two figures and three tables in the original article. Figure 2 and Tables 1 and 2 can be, almost, perfectly replicated. Table 3 and Figure 1 can not be replicated from the code/data on deposit at the Dataverse.

```
stargazer(remain_1, remain_2, remain_3,
  header = TRUE,
  style = "ajps",
  dep.var.labels = "Children of undocumented be allowed to stay?",
  omit.stat = c("f", "ser", "aic", "LL"),
  covariate.labels = c("Treatment", "Male", "Age"),
  digits = 2)
```

% Table created by stargazer v.5.2.2 by Marek Hlavac, Harvard University. E-mail: hlavac at fas.harvard.edu
% Date and time: Tue, Feb 26, 2019 - 15:33:08

Table 1:

Children of undocumented be allowed to stay?			
	Model 1	Model 2	Model 3
Treatment	0.37 (0.46)	0.39 (0.47)	0.45 (0.47)
Male		0.27 (0.47)	
Age			0.02 (0.02)
Constant	-1.65*** (0.33)	-1.81*** (0.45)	-2.48** (0.98)
N	123	123	123

***p < .01; **p < .05; *p < .1
